April 2018

**Supply Interruption Update  
Potassium Chloride for Injection Concentrate, USP**

Dear Valued Customer,

This letter is to update you on a supply interruption involving our Potassium Chloride product line so that appropriate contingency plans can be made to help facilitate patient care. Due to increased demand, we are experiencing a supply interruption. Additionally, the late April delivery of 0409-6651-06 has been postponed until late June 2018 due to a manufacturing issue. Currently we are stocked out of Potassium Chloride and anticipate the June deliveries listed below will not fulfill all backorders.

Pfizer Injectables is making every effort to restock the market and provide product to our customers in a manner that is equitable, efficient, and compliant. Product and supply details are listed in the table below.

Unit of Sale NDC	Description	Next Delivery	Estimated Recovery
00409-6635-01	Potassium Chloride for Injection Concentrate, USP 10 mEq/5 mL (2 mEq/mL) Single Dose Glass Fliptop Vial	Early June	Q3 2018*
00409-6651-06	Potassium Chloride for Injection Concentrate, USP 20 mEq/10 mL (2 mEq/mL) Single Dose Plastic Fliptop Vial	Late June	Q3 2018*
00409-6653-05	Potassium Chloride for Injection Concentrate, USP 40 mEq/20 mL (2 mEq/mL) Single Dose Plastic Fliptop Vial	Late June	Q3 2018*

\*Exact recovery timing will be impacted by demand levels over the coming months

Pfizer Injectables is committed to keeping you informed on supply interruptions and will continue to provide updates on this situation as new information becomes available. Please reach out to your Pfizer Injectables sales representative if you have any questions.

Thank you,

Kim Rouse Wing  
Senior Portfolio Manager, Specialty Injectables
